

Logo contest for Biological Basis of Behaviour

Unleash your artistic talent. What used to be BBE100, **Introduction to Brain, Behaviour and Evolution**, is turning into BIOL122, **Biological Basis of Behaviour**. The new name demands a new logo for the course, especially needed as little else about the Planet unit will change. So design, or better yet, draw a logo for the new **BBB**. The width of the logo should be a bit bigger than its height, but no firm prescriptions are given. You may steal copyrighted materials, as the logo will only be used for 'internal' consumption. But original drawings will be especially favoured.

BIOL122 Biological Basis of Behaviour has these topics:

Introduction, How science 'works', Ethics, Good study habits
Brief history, Tinbergen's explanations
Evolution, including evolution of behaviour
Genetics and epigenetics
Neuroscience, including the senses
Perception
Learning
Animal Behaviour
Communication, Sexual selection
Human evolution
Topics in human behaviour: Mating, Food, Culture and altruism
Rise of civilisation and its influence on the planet

Instructions: Submit a logo in jpeg format, at least 150 dpi. Email the logo to Anne Marie Monchamp: annemarie.monchamp@mq.edu.au, who will anonymise the submissions. You can help by not putting your name in the name of the submitted file.

Due date: 15 December 2015

Prize: The chosen logo will feature in the corners of lecture slides for BBB, and also on the very first slide to be shown, with credit to the artist. Oh, and \$100 to your research account (what is left of some CACTA award money).
