

SYDNEY - SOCIETY FOR
CONSERVATION BIOLOGY

Conservation Café

Saturday March 5th @ 10am – Learning Centre, Centennial Parklands

RSVP on <https://ConservationCafeMarch16.eventbrite.com.au>

Are you interested in the conservation of the Earth's biological diversity? Would you like to meet like-minded people and hear about the work being done in the Sydney Region and beyond?

Conservation Café is a monthly event hosted by the Sydney Society for Conservation Biology to celebrate and learn about the incredible work being done by our region's conservation professionals and volunteers over a cup of coffee and a chat.

This March, Sydney-SCB welcomes **Dr Cameron Webb, Hospital Scientist at Westmead Hospital and Clinical Lecturer at the Department of Medical Entomology at The University of Sydney**. Cameron is an expert in mosquitoes and their role in mosquito-borne disease outbreaks. His work is concerned with how wetlands are constructed and rehabilitated so that they do not pose an increased risk of pest or public health risks. Cameron is interested in the role of mosquitoes in local ecosystems and is one of the authors of **A guide to Mosquitoes of Australia**, just recently published in Feb 2016. This book is the first time this information has been pulled

together for a wide range of common mosquito species and also contains supporting chapters on mosquito biology, habitats, pest and public health concerns (ISBN: 9780643100305 – RRP AU \$49.95).

Don't miss out on the opportunity to hear Cameron talk to us about **“Mosquitoes, we hate them but are they important to the environment?”**

THE UNIVERSITY OF
SYDNEY

Complimentary tea, coffee and pastries provided by Sydney-SCB with re-usable cups available for purchase with proceeds going towards our conservation projects.

About Sydney-SCB: The Sydney-Society for Conservation is a regional chapter of the global Society for Conservation Biology, and the third chapter formed in the Oceania Region. Our mission is to advance the science and practice of conserving the biological diversity of the Sydney Region and beyond.
