

SYDNEY - SOCIETY FOR  
CONSERVATION BIOLOGY

# Creative Conservation: Watercolour and Frogs

Saturday May 21st @ 10am – 3.30pm – Education Precinct, Centennial Parklands

The Sydney Chapter for the Society of Conservation Biology run an exciting workshop series called "Creative Conservation". We bring together the arts and the sciences by choosing a group of plants or animals to draw every few months. Professional artist [Peter](#) [Wale](#) teaches us basic drawing techniques and Sydney SCB provide some inspiration in the form of specimens and photos.

Last session we explored a little bit about water colours in birds, and will continue to explore them using froggy subjects.

Snacks, drinks and some materials will be provided, but we suggest you bring along some of your own materials from the list below.

**There is a maximum class size of 12, so get your tickets quick!**

**Price:** Sydney SCB members \$50, Non-members \$70

To be eligible for the Sydney SCB members price, please provide us with your full name and global SCB membership number on the registration form.

**Want to join Sydney SCB?** Sign up here: <http://sydneyscb.org/join/>

Members of the Sydney SCB chapter must also be members of the global society.

All event profits will go to our local conservation projects.

[RSVP on EVENTBRITE](#)

**About Sydney-SCB:** The [Sydney-Society for Conservation](#) is a regional chapter of the global [Society for Conservation Biology](#), and the third chapter formed in the Oceania Region. Our mission is to advance the science and practice of conserving the biological diversity of the Sydney Region and beyond. Check us out at <http://sydneyscb.org>, find us on [facebook.com/sydneyscb](https://www.facebook.com/sydneyscb) or follow us on twitter [@SydneySCB](#)
