

PhD Scholarships: Evolutionary responses to environmental change

Supervisor: Associate Professor Carla Sgrò, School of Biological Sciences at Monash University, Melbourne, Australia.

Fully funded PhD scholarships are available for students interested in studying adaptation to environmental change to come work in my lab. The key questions that drive our research program are:

How does the environment influence the expression of genetic variation that underpins adaptation?

What role does nutrition play in mediating evolutionary responses to rapid environmental change? (in collaboration with Dr Christen Mirth)

How important is sex-specific adaptation to evolutionary responses to environmental change? (in collaboration with Dr Tim Connallon)

Visit <http://carlasgrolab.org> to find out more about what we do.

If you think you might be interested in working with us, email me at carla.sgro@monash.edu so we can discuss possible projects in detail.
