Translocation Health Symposium
23 February 2019, Sydney

The Australian Registry of Wildlife Health, supported by the Cybec Foundation and CL Davis Foundation, is hosting a Translocation Health Symposium at Taronga Zoo on Saturday 23rd February 2019.

The Translocation Health Symposium will highlight the many disciplines of translocation science including ecology, nutrition, behaviour, welfare, and disease risk analysis. Panel discussions will provide an opportunity for engagement and the exchange of ideas and best practice.

Internationally acclaimed translocation health specialists will be in attendance including veterinary pathologist Dr Bruce Rideout (San Diego Zoo), nutritionist Ellen Dierenfeld (Nottingham Trent University), and eminent ecologist Carl Jones (Durrell Wildlife Conservation Trust). We will also be welcoming insight and advice from local translocation specialists to deliver this fascinating program.

The Symposium will close out the Wildlife Health and Pathology Short Course also being held at Taronga Zoo, 18 – 22 February. There will be a conference dinner on the evening of the 22nd February, and we would be delighted if you could attend and meet members of the wider wildlife health community.

Registrations are now open!

Course program, speaker bios, and online registrations are accessible via the Registry website: [https://arwh.org/event/wildlife-health-pathology-short-course-2019](https://arwh.org/event/wildlife-health-pathology-short-course-2019)
